

## Technology Planning Committee

Feb. 16, 2016 1:30 PM

D429

Mike gave an update on this year's budgeted projects:

ICN Room – ICN room is completed, current classes are using it, making tweaks to the system and scheduling some testing with area schools

Doc management – SoftDocs went live in December, continuing to add features

New Wireless system installed late this past summer – been solid

New LLRC DVR installed, supports live streaming of our camera system

Email archive has been replaced this year, by law we have to archive(2008)

Implemented SchoolDude as a helptrac replacement

### Classroom Technology

Talked about new classroom technology and how we can adapt current classroom podiums for more active learning (Apple TV) ipads, hovercams, mimios

### New AT Building classroom technology

Steve W gave an overview of the classroom technology being installed in the New Applied Tech Building

### Upcoming budget requests

Update our SAN and servers-Mike mentioned the current servers and storage are over 5 years old and will need to be replaced

Generator-Mike has a generator listed as a possible equipment request for the datacenter

Campus signage-Mike showed an alternative solution to the current NINE signs, and although group agreed it was a better option, the recommendation was to wait until a system of procedures was in place to make sure there was a department or individuals responsible to keep the information current. It was recommended to discuss this at the next Executive Council meeting.

Meeting adjourned at 2:30 PM
